

FLAMENCO IP+

Digitization is managed.
Communication is secure. From human to human.

Diagnosis: Progressive digitalization

Now also the Tunstall nurse call.

For over 50 years, Tunstall has been one of the leading manufacturers of nurse call systems in Germany and in many European countries. Many groundbreaking innovations such as the nurse call with speech or the so-called "Code Blue" originate from Tunstall and are today now standard in nurse call systems all over the world. Now digitalisation is holding its own with the health service and the care organization and starts a new era. With the new Flamenco^{IP+} digital nurse call we are creating new conditions for this new digital era and for the collaboration of people, the interaction of applications and device connectivity. Digital nurse call from the system market leader.

Advantages of IP technology:

- Use of uniform infrastructures, open platforms
- new customer-oriented and digital applications
- Integration of standard solutions, e.g. mobile devices
- System maintenance via remote upgrades/updates
- simple exchange of information among each other
- Individual applications with standard modules
- future-proof technology
